Scope of Project

- Originally tasked with building all components of mobile site
- Scope shift to agile development of desktop / mobile site (schedule, social)
 - Feature ownership
 - Consistent data and style
 - Easier maintainability

Schedule & Social

VS

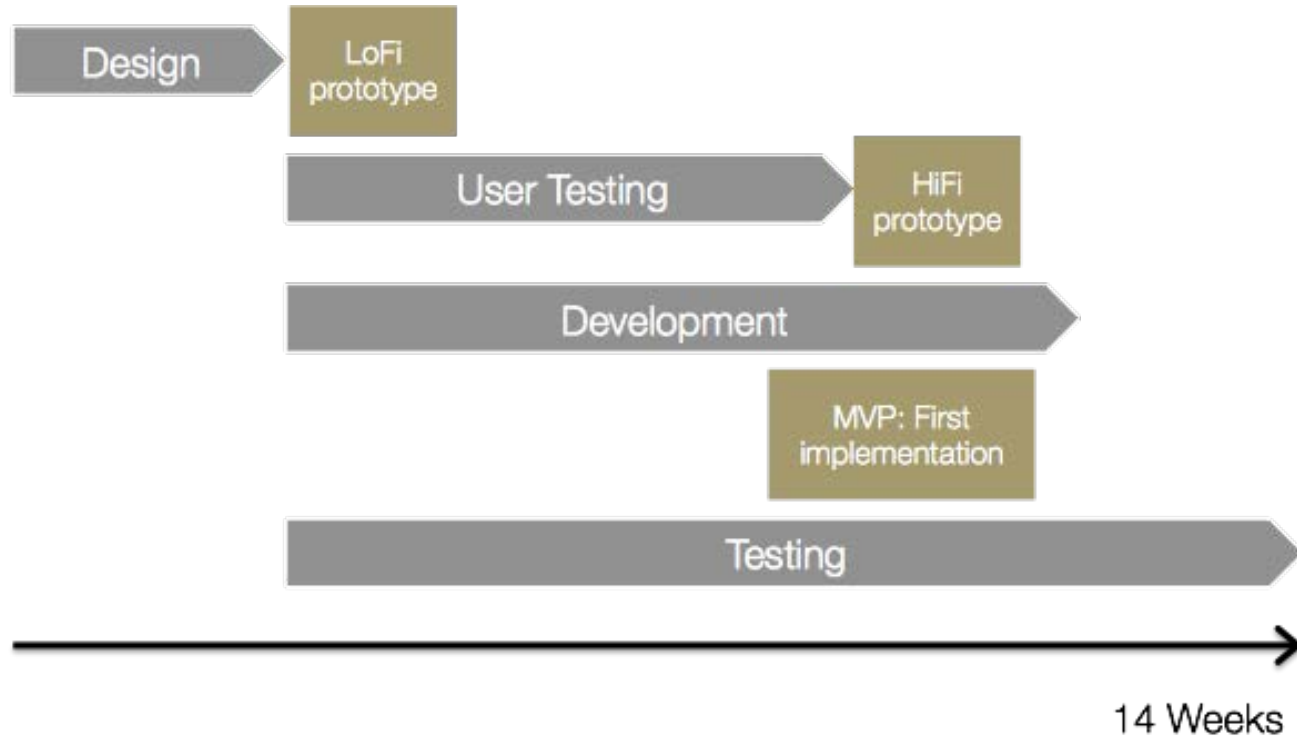

Main PCF site

Key Use Cases

- Desktop and mobile friendly
- Easily understand the scheduler
- Social Media integration
 - Twitter, Facebook
- Differentiate between past and future events
- Saving/starring shows
- See info on performers, venues, and show types
- Brian and Jerome can easily import data from JSON

Project Timeline

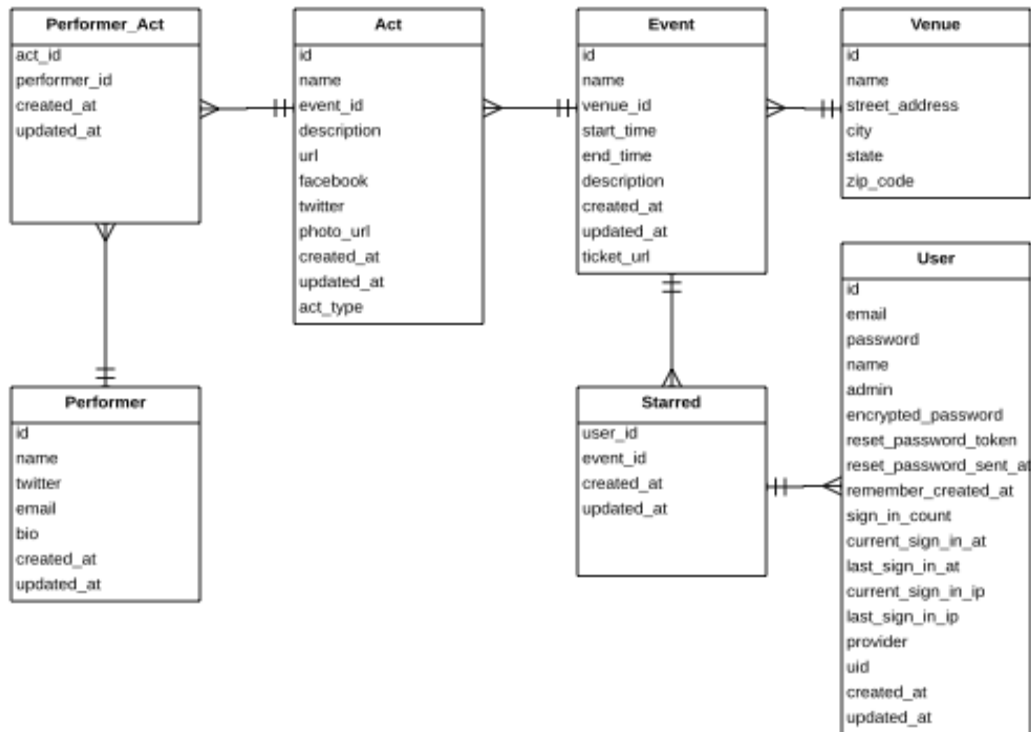

Development Approach

- One meeting with client each week
- Two internal meetings a week, more if needed
 - Meetings typically run as:
 - Updates on progress, discuss issues, work/develop
 - Client liaison contacts Brian and Jerome as needed, keeps them up to date on progress
- Agile method
 - Some practices of scrum
- Flexible and Adaptable to change

Design - backend

Design - Data Consistency

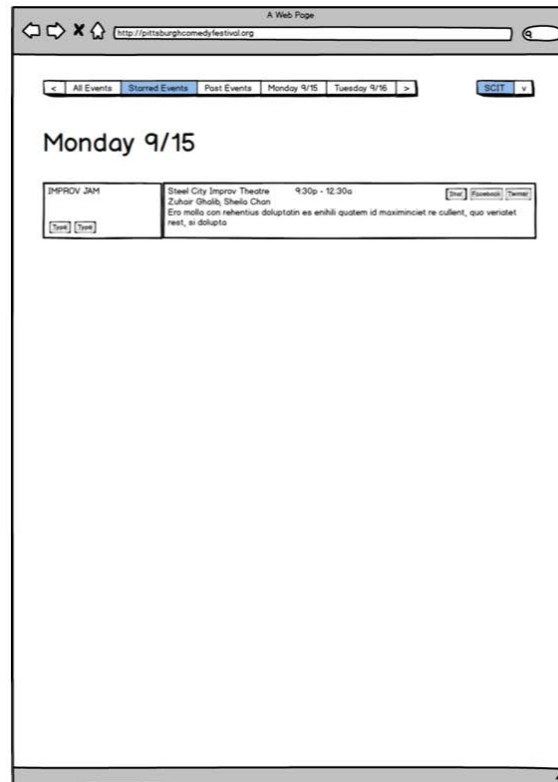

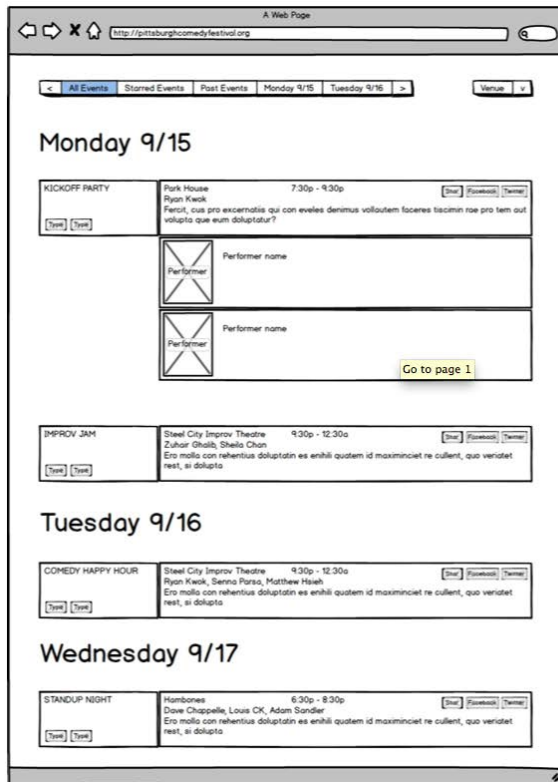

Replication of client's data from WordPress

Json Importer

- Fixed Data
- A.C.I.D.
- Association Logic

```
{
  "id": 7,
  "name": "Backstage Bar",
  "venue_id": 4,
  "start_time": "2014-08-28T23:30:00-05:00",
  "end_time": "2014-08-29T02:00:00-05:00",
  "description": "Come out after the jam to support a
sponsor and get to know some of the local comedians",
  "types": [
    "community"
  ]
}
```

Design - frontend

Design - frontend mobile

Technology

Product

Demo:

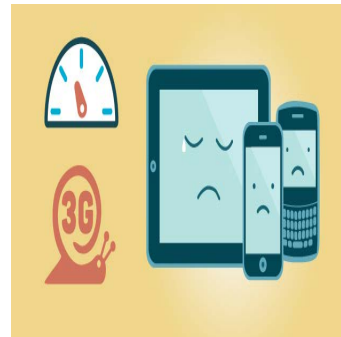

- As a user
- As clients (import data)

Continuing Work

JavaScript

Mobile

Looking Ahead

- Knowledge transfer
- Documentation
- Integration

Learning Opportunities

- Frequent changes to project scope

- Mobile development

- Issues with RSPEC

- Different frameworks

- PHI has \$6 Yuengling pitchers on Tuesdays
